PROJECTS

KOCAELI UNIVERSITY (GRADUATION PROJECT)

Development of Web Pages Kocaeli University | February 2022 - Ongoing

- Kocaeli University Project is a set of modular systems that enables the web pages of all departments and departments of university faculties to be managed through a single API.
- Developed RESTful API with Asp .Net Core.
- PostgreSQL was used for the database.
- Next js was used for admin panel and websites.
- During development, projects were hosted on VDS.
- Developed in accordance with Devops and CI/CD processes.

PLEIADES MEDITATION (FREELANCE)

Academy Management Project | June 2021 - August 2021

- In line with the company's needs, an application that helps people manage and follow the business while communicating with the company executives was developed.
- During the development of this application, we worked on .Net Core MVC with layered architecture in accordance with SOLID principles.
- After the improvements had been completed, the necessary updates were done, considering the feedback we had gotten before.
- The application was designed for the users to read, update and create the data in the fastest and easiest way possible.
- You can view the demo at enginyenice.net.

OTHER SKILLS

- Ability to analyze complex technical information
- Ability to analyze, design and implement database structures
- Paying attention to details
- Creative and clean coding skills.
- Looking for out-of-comfort-zone challenges,

DEMIRDOKUM AUTHORIZED SERVICE NAIF KOC (FREELANCE)

Service Management Project | December 2020 - February 2021

- In line with the company's needs, an application that helps people manage and follow the business while communicating with the company executives was developed.
- During the development of this application, we worked on .Net Core MVC with layered architecture in accordance with SOLID principles.
- After the improvements had been completed, the necessary updates were done, considering the feedback we had gotten before.
- The application was designed for the users to read, update and create the data in the fastest and easiest way possible.
- You can view the demo at enginyenice.net.

HAZAR PLASTIK MOLD INDUSTRY (FREELANCE)

Production Tracking Automation | December 2019 – December 2020

- It is aimed to follow the mold production line by employees and customers.
- An application that helps people in line with the needs of the company managing and following the business while communicating with the company managers was trained.
- We worked on PHP during the development of this application.
- Necessary updates after the improvements are completed
- It has been made taking into account the feedback we have received before.
- The application is designed for users to read, update and create data in the fastest and easiest way.

ACRON INFORMATICS (INTERN)

Fashion Management | July 2017 –August 2017

- I took part in the SAP FMS (Fashion Management) Project, which is a first in Turkey.
- I applied the tests of the project.
